

AMET Primary Mathematics Conference. 11th March 2015

Focus

Primary Mathematics
Pedagogy and Task Design

Audience

Primary Initial Teacher
Educators, Mathematics
Education Advisors, School
Subject Leaders and
Primary Mathematics
Specialists

Venue Hendon Town Hall,
The Burroughs, London,
NW4 4BT

Time

9.30 – 16.00

Cost

£100 non members
£80 AMET members

Lead Speaker:

Anne Watson is Emeritus Professor at Oxford University. Her research interest in exemplification and task design in mathematics teaching and learning is a fascinating and highly relevant area of study particularly with the current curriculum focus on mathematical reasoning and problem solving.

Anne will be leading a workshop that focuses on her work in mathematics education from a *Variation Theory* perspective where intelligent practice integrates the opportunity for both the development of procedural fluency and the deepening of conceptual understanding.

This has particular relevance to ITE tutors who are developing the Primary Mathematics Specialism within their QTS programmes and for schools and Local Authorities who have invested in a Specialist Primary Mathematics teacher.

09.30	Registration, coffee and welcome	
10.00	Variation Theory Workshop	Professor Anne Watson
12.00	Lunch and networking	
12.45	Report on Shanghai teacher visit and the Maths Hub initiative	Martin Little
14.15	Break	
14.30	Observing <i>Learning</i> to develop practice	Helen Farmery and Sally Bamber
15.30	Questions and opportunity to share models for pre QTS Primary Mathematics Specialism programmes	
16.00	Close
