

## Submit a Manuscript to the Journal

# Research in Mathematics Education

## For a Special Issue on

# Mathematics Education and Policy

Special issue editors

Mark Boylan, Gill Adams, Laurie Jacques

**Abstract deadline 31<sup>st</sup> July 2024**

**Manuscript deadline 13<sup>th</sup> January 2025**

### Aims and Scope

The editors of this Special Issue invite contributions that examine the relationship between mathematics education and policy.

Potential themes and topics include:

- Historical policy reviews and analyses
- Research on the enactment of mathematics education policy at system/national levels
- Analyses of policy influences and drivers
- The relationship between mathematics education research and policy
- The scaling of mathematics education research to implementation in policy
- Transnational mathematics education policy and comparative research comparing policy influences across different countries
- Studies examining relationships between mathematics educators and policy makers
- Theoretical contributions examining the utility of policy theory and methodology to understanding the relationship of mathematics education and policy
- Emerging priorities for future mathematics education research and policy debates

For full details of the call and timeline please see:

### Submission Instructions

In addition to full research papers (7,000-8,000 words), the editors welcome shorter reports on specific mathematics education policies or national examples of mathematics education policy issues relevant to the themes and topics.

We invite submission of proposed titles and 400-500 word extended abstracts

Please submit abstracts (400-500 words) by email to [rme@bsrlm.org.uk](mailto:rme@bsrlm.org.uk) by 31 July 2024. Include the names and affiliations of all authors.

Please note that any proposed papers that are invited for full submission will be subject to usual review processes.
